

Alexander Koutamanis

Alexander Koutamanis studied architecture at the Aristotle University of Thessaloniki, Greece. He received his PhD from Delft University of Technology, The Netherlands, for a thesis on the automatic recognition of architectural drawings. He is Associate Professor of Computational Design at the Faculty of Architecture & the Built Environment, Delft University of Technology. He has also worked as architect in Greece and as a senior consultant with the Government Buildings Agency in The Netherlands. He is executive board member of the LDE Centre for BOLD Cities. His last book, *Building information – representation and management* (<https://doi.org/10.5074/T.2019.003>), presents the fundamental and principles of digitization in architecture.
