

**Nicoleta Panagiotidou** is the founder of BIM Design Hub and has 15+ years of experience as an architect, on a wide range of projects from inception to completion across sectors. Having worked both as a project architect and Head of Design, she has been involved in complex construction projects with a focus on architectural solutions, project management and coordination.

As well as having a great track record in construction projects, she is following international BIM developments and she is very keen on supporting innovation in the construction industry, promoting BIM initiatives and courses on Autodesk BIM authoring and analyzing tools. Already highly proficient in digital design, since 2002 and knowledgeable about BIM Level 2, she is one of the early adopters of BIM in Greece and the creator of [breakwithanarchitect](#), a blog about BIM and digital innovation.

Nicoleta is a BIM Informed Professional from the Building Research Establishment, (BRE), while her passion for digital innovation and the construction sector has led her to be involved in BIM research in the university of UCL, in United Kingdom. She also specializes in Sustainable Design, with an MSc from the University of Edinburgh and holds the certification of BREEAM Associate, from BRE.
